

Microsoft Services

First Distribution has now enabled Microsoft Services across our Modern Work, Security and Azure platforms to assist partners with these 3 critical steps to move your customers workloads into the Cloud.

Our Microsoft Services catalogue offers you multiple different pre-defined deployment options for Modern Work and Security as well as scope-based offers specific to Azure. These offers are available on your webstore, you merely need to activate them. Let us help you Assess, Migrate and run the implementation through our new Professional Services offering.

Professional Service	Service Description
Exchange Online - Mailbox Configuration	Remote Mailbox Configuration: Standard Exchange deployment including Tenant configuration, User allocation to licenses, Active Directory integration and DNS integration for mail purposes (excluding PST ingestion) - Per User Cost
Exchange Online - Mailbox Configuration and PST ingestion	Remote Mailbox Configuration: Standard Exchange deployment including Tenant configuration, User allocation to licenses, Active Directory integration and DNS integration for mail purposes (including PST ingestion) - Per user cost
Microsoft 365 - Business Basic/Standard and E1 Configuration	Remote License Configuration: Standard Exchange deployment including Tenant configuration, User allocation to licenses, Active Directory integration and DNS integration for mail purposes (excluding PST ingestion) - Per user cost
Microsoft 365 - Business Basic/Standard and E1 Configuration and PST ingestion	Remote License Configuration: Standard Exchange deployment including Tenant configuration, User allocation to licenses, Active Directory integration and DNS integration for mail purposes (including PST ingestion) - per user cost
Microsoft 365 - Business Premium Configuration	Remote License Configuration: Standard Exchange deployment including Tenant configuration, User allocation to licenses, Active Directory integration and DNS integration for mail purposes, Azure Active Directory Premium P1, Intune, information protection & Endpoint analytics (excluding PST ingestion) - per user cost
Microsoft 365 - Business Premium Configuration and PST ingestion	Remote License Configuration: Standard Exchange deployment including Tenant configuration, User allocation to licenses, Active Directory integration and DNS integration for mail purposes, Azure Active Directory Premium P1, Intune, information protection & Endpoint analytics (including PST ingestion) - per user cost
Microsoft 365 - Enterprise E3 Configuration	Remote License Configuration: Standard Exchange deployment including Tenant configuration, User allocation to licenses, Active Directory integration and DNS integration for mail purposes, Azure Active Directory Premium P1, Microsoft Intune, Azure Information Protection P1, Microsoft Advanced Threat Analytics, Azure Rights Management (part of Azure Information Protection) deployment (excluding PST ingestion) - per user cost
Microsoft 365 - Enterprise E3 Configuration and PST ingestion	Remote License Configuration: Standard Exchange deployment including Tenant configuration, User allocation to licenses, Active Directory integration and DNS integration for mail purposes, Azure Active Directory Premium P1, Microsoft Intune, Azure Information Protection P1, Microsoft Advanced Threat Analytics, Azure Rights Management (part of Azure Information Protection) deployment (including PST ingestion) - per user cost
Microsoft 365 - Enterprise E5 Configuration	Remote License Configuration: Standard Exchange deployment including Tenant configuration, User allocation to licenses, Active Directory integration and DNS integration for mail purposes, Azure Active Directory Premium P1, Microsoft Intune, Azure Information Protection P1, Microsoft Advanced Threat Analytics, Azure Rights Management, Azure Active Directory Premium (AADP) P2, Azure Information Protection P2, Microsoft Cloud App Security, Azure Active Directory [AD] Identity Protection (as a feature of AADP P2), Azure Advanced Threat Protection, Azure AD Privileged Identity Management. (excluding PST ingestion) - per user cost
Microsoft 365 - Enterprise E5 Configuration and PST ingestion	Remote License Configuration: Standard Exchange deployment including Tenant configuration, User allocation to licenses, Active Directory integration and DNS integration for mail purposes, Azure Active Directory Premium P1, Microsoft Intune, Azure Information Protection P1, Microsoft Advanced Threat Analytics, Azure Rights Management, Azure Active Directory Premium (AADP) P2, Azure Information Protection P2, Microsoft Cloud App Security, Azure Active Directory [AD] Identity Protection (as a feature of AADP P2), Azure Advanced Threat Protection, Azure AD Privileged Identity Management. (including PST ingestion) - per user cost
Teams - Microsoft Teams core capabilities	Enable Microsoft 365 or Office 365, Configure your environment for identities, Configure roles and permissions, Configure tenant-wide Teams settings, Configure guest access, Configure Teams naming policy, Configure Exchange for the Teams SMTP domain, Configure and manage user access to Teams, Assign licenses to users
Enterprise Mobility + Security E3 Configuration - E3	Includes Azure Active Directory Premium P1, Microsoft Intune, Azure Information Protection P1, Microsoft Advanced Threat Analytics, Azure Rights Management (part of Azure Information Protection) deployment - per user cost
Enterprise Mobility + Security E5 Configuration - E5	Includes Azure Active Directory Premium P1, Microsoft Intune, Azure Information Protection P1, Microsoft Advanced Threat Analytics, Azure Rights Management, Azure Active Directory Premium (AADP) P2, Azure Information Protection P2, Microsoft Cloud App Security, Azure Active Directory [AD] Identity Protection (as a feature of AADP P2), Azure Advanced Threat Protection, Azure AD Privileged Identity Management - per user cost
Service Product Code/Sku	Service Description
SharePoint Migration services - per hour	File migration from Sharepoint on premise to sharepoint Online
